How to add new blog

1. Create file with name of the new blog in folder posts: **file_name_example.md**
2. **Add title and any details in this file with this structure :**

   ```
   ---

   title: 'Second Blog'

   text: 'My Second Blog'

   createdBy : 'John Biakolo,'

   createdAt : 'April 15th 2022'

   author: 'Cassidy'

   logo_text: 'PHANTOM'

   ---
   ```

3. then push your file to CircleCI with this commands:
4. **Git add . && git commit –m "message of commit" && git push**
